James McGowan is a professional firefighter in Toronto, Ontario, Canada. Due to his career in one of Canada's busiest fire halls and his passion for the outdoors, he started making "hard working knives" and joined the Canadian Knifemakers' Guild in 1998. Drawing from his extensive real life fire and rescue experiences, he has designed the CRKT production MAK-1™ and Extrik-8-R™ emergency rescue tools, based on the day-to-day needs of the professional firefighter, EMT, and rescue volunteer.

The **MAK-1™** is a rescue knife designed to meet the needs of a firefighter, made of tough 3CR13 stainless steel. It has a chisel pry-bar tip, knife edge, textured G10 scales, window twist breaker and battery wrench grooves, carbide tip butt breaker and an orange reflector lanyard. It comes complete with a Cordura® sheath which will hold a shove knife and an Extrik-8-R™ tool.

The **Extrik-8-R™** is a lightweight seat belt cutter which is also an oxygen bottle wrench and has two screwdriver tips, plus an orange reflector fob. A Kydex® sheath is included. Also available in black.

Cordura sheath with pockets for shove knife and Extrik-8-R.
